Pre-PowerPoint-era bosses relied on the Kodak Carousel (#71) for visual communication. Here, Don Draper pitches the ad campaign for the gadget on *Mad Men*.

64.

The derringer used to assassinate Abraham Lincoln was actually a deringer, with one r. Renowned pistol-maker Henry Deringer's original Philadelphia Deringer, produced from 1852 through 1868, spawned copycats worldwide, and the name—albeit misspelled—became a generic term for any small, large-caliber handgun.

59. CD-ROM

See p. 60, *Saving the World*

60. MOOG SYNTHESIZER

Among the first widely used electronic instruments, the Moog used analog circuits to generate sound electronically. Without it, the Doors' *Strange Days*, Simon & Garfunkel's *Bookends* and the Beatles' *Abbey Road* would have sounded much different.

61. SMOKE DETECTOR

Duane Pearsall wanted to curb static in photo darkrooms, but noticed that a meter measuring ion concentration on his static-control device flat-lined whenever cigarette smoke hit it. "By accident, we had discovered how to make an ionization smoke detector," Pearsall said.

62. CHARCOAL GRILL

See p. 63, *Great American Weekend*

63. LUNCHBOX

When Aladdin Industries launched the Hopalong Cassidy kit in 1950, it kicked off the lunchbox boom: *Between 1950 and 1970, 120 million lunchboxes shot off store shelves* as America's youth scrambled to get the latest in branded boxes.

64. DERRINGER

The authenticity of the Booth deringer at Ford's Theater came into question in 1997 after members of a bygone burglary ring claimed to have stolen the original in the 1960s. FBI forensic tests disproved the claim; the gun on display in D.C. (shown here) is the one used to kill Lincoln in 1865.

65. ZIPPER

See p. 56, *Gizmo Expos*

66. TAPE MEASURE

See p. 57, *Man at Work*

67. BINOCULARS

See p. 63, *Great American Weekend*

68. COLEMAN LANTERN

See p. 63, *Great American Weekend*

69. ELECTRIC TOOTHBRUSH

U.S. Navy submariners didn't have much to smile about: Subsisting on mushy canned food for months on end, they got almost zero gum stimulation. Electric toothbrushes came aboard in 1959, solving the problem. They later found a wider audience—and inspired the invention of another vibrating device (but that's a gadget for an entirely different article).

70. BOOMBOX

See p. 53, *Music Machines*

71. KODAK CAROUSEL

Adman Don Draper said it best in his pitch to Kodak execs in an episode of the '60s-set show *Mad Men*: "This device isn't a spaceship, it's a time machine." He waxed poetic about the Carousel, the ingenious 35-mm slide projector, while clicking through images of his family life before it unraveled. "It lets us travel the way a child travels—around and around and back home again."

72. STOPWATCH

When the TAG Heuer Mikrograph stopwatch was invented in 1916, it allowed the measurement of time with unprecedented accuracy—down to 1/100 second. This precision led to major changes in the sports world, including records such as the world's first sub-4-minute mile (3:59.4, by Roger Bannister, May 6, 1954). Digital stopwatches accurate to 1/1000 second debuted in 1971.
