President’s Planning Group Discusses Objectives

(Notes: The following was re-
leased by the President's Plan-
ing Committee to the Tech
News. Ed.)

Guestmen: The President's Planning Group was organized to present draft long-range plans for the Insti-
tute. In order to present these plans we are seeking information from everyone connected with
Worcester Technical. The entering class, potential em-
ployers, faculty, alumni, etc. The purpose of this briefing is to let you know what we are about and invite your comment.

Before we go into the discussion, we should clear up one thing. Some of you have in-
quired about the possibility of student membership in the Group. All members of the Group are in their conviction
that active student participation
will be required. When
the activity is defined well
enough that student members could attack specific problems and that these be identified directly
with the work, we will need specific student help. In the meantime, feel free to talk
to any of the Group about the work. While we occasionally deal with delicate situations, our work is not secret. We do want your suggestions, written or pos-
itive, oral or necessary.

Now just what are we doing?
what is meant by "long range"
(Continued on Page 6)

Excerpts From President's Report To Trustees

Guestmen: "The Tech campus is quietly being developed actively. We do not mean in the "activ-
ing" sense of the day's present-day connotation of that word.

"At our January faculty meeting, the Worcester Tech Chapter of the American Association of University Professors, with Dr. Harry Magruder as chair, submitted a propos-
el in regard to studying changes in the faculty's organizational
structure. At that end, a committee was formed to develop a faculty constitution which will be presented for dis-
cussion at the April faculty meeting. This represents a de-
votion on the part of the Tech faculty to improve communications, to plan for the lesser "day to day" matters which concern the faculty, and to formulate the reasonable es-
cpectations of dedication of the fac-
y in a written document. This is a certainly a desirably pro-
gressive step, one which will without doubt stimulate a greater involvement of our fac-
ulty in matters of their proper concern.

"A comment in my address to freshmen parents on November 9 made local headlines when I predicted that on the campus of the future students would govern themselves, with the administration stepping in only if the self-government sys-
tem broke down. In other words, there should be a threat of the right to "foul play" of property. I had not thought of this as a sensa-
tional observation, but rather as a reasonable predic-

Trustees Approve Pariclel Hours For Second Semester Freshmen

The Worcester Tech Board of Trustees met Saturday morn-
ing, confronted with a lengthy agenda and several significant areas of discussion. The Board, in several major decisions, vo-
ted to give second semester freshmen greater privileges and to renovate part of Sanford Hall first floor as a fe-

On Thursday, February 13, classical guitarist Miguel Rubio
will be heard at Worcester Tech in Alden Auditorium. The concert, which begins at 8 p.m., is sponsored by the Stu-
dent Assembly Committee.

Rubio's ability to play his in-
strument results in a style that attracts not only the younger generation, but also the mature listener and music lover as well. He offers a wide range of the guitar's col-
ors, accented by a Spanish un-
usual sensitivity. Although young, he has already achieved great success throughout Europe and the U. S. A.

The concerts are free. All tickets will be available at the Board Finance and Investments Committee.
The resignation of Mr. E. R. Van Landingham, Jr., President of the American Au-
cient of Victorian Organists, was accepted. Mr. Blaik is the Chair-
man of the Executive Commit-
tee of AVCO Corporation.

The Alumni Board of the Insti-
tute, is consistent in the decisions of the Trustees and was ac-
cepted. Mr. Blaik is the Chair-
man of the Executive Commit-
tee of AVCO Corporation.

The resignation of Mr. E. R. Van Landingham, Jr., President of the American Au-
cient of Victorian Organists, was accepted. Mr. Blaik is the Chair-
man of the Executive Commit-
tee of AVCO Corporation.

tute, is consistent in the decisions of the Trustees and was ac-
cepted. Mr. Blaik is the Chair-
man of the Executive Commit-
tee of AVCO Corporation.
The Liberal View  
by Paul Cleary

The suicide of Jan Palach as a protest of the Russian occupation of Czechoslovakia, is an act to be both mourned and lauded. Mourned as the tragedy which it is— the termination of one’s own life, but lauded as an act of supreme selflessness in a time when such acts are rare. Everyone, Pope has stated that although he cannot condone Palach’s act, he can admire the consequences which will result, or which were intended to result. If the mark of a young man is his desire to die nobly for his cause, Palach has proven his youth.

Palach’s last note said he was Torch No. 1. Already a Greek girl has committed suicide leaving a note saying she was suppoging to be Torch No. 2, but choose death by gas instead. Who knows how many other Greek students are part of the pact. The fear now is that Palach’s death will cause students throughout the world to emulate his fiery death for their causes.

The United States has experienced students setting themselves on fire as a protest of the Vietnam War even before Palach. Soon we may find an even more radical form of protest than now employed by students, sweeping western countries. For those people who find the thought of students marching, taunting, and taking over buildings dismaying; the thought of students burning themselves to death can only be more so. Palach’s death may not accomplish his goals, an end to censorship in his country and the prohibition of the Soviets’ occupation newspaper, but it will have its effect on the people of the world. Hopefully, the effect will be more lasting than that of a spark that will light the bodies of hundreds more.

P.G.
The President’s Planning Group met last Thursday in the library seminar room to discuss the student unrest. The meeting was to make the student body aware of their plans and to discuss the possible participation in the program. The group was to be proposed on the assumption that WPI will remain a private endowed university. The group was to be limited to 10, and 100 students would be chosen. The meeting was to be held in the library seminar room on Monday, and the group was to be composed of a minimum of 10 students. If the group was to be formed, the curriculum at WPI would be changed to allow greater access to the average student as the suggested curriculum would be largely based on the aforementioned student. To alleviate this situation, the University of Washington had proposed a program which would have a broader range of liberal arts subjects to choose. Dr. Van Alstyne commented that in a meeting of the Department Heads and Dormitory Directors, there was this suggestion with the emphasis more on the graduate level. He explained that this brings up a sensitive situation because some departments are weaker than others.

More suggestions to deemphasize in favor of practicality were: the activation of a work-study program, creative courses instead of the conventional "cook book" lab, and a reduced schedule to aid in outside reading.

Howard Shore then injected a most apropos quote from the Norvegian novelist’s "The Inte­ rmonitory" in which he stated that the student, faculty, and student— the faculty was the most important problem as there should be a better balance between the faculty and the administration. WPI and N.E.G. Group replied that a recent meeting of the faculty produced a consensus and a 10 to 6 members. Other suggestions that were mentioned were emphasis with the start of a pass-fail system and the termination of the sophomore lecture course. To the latter, Dr. Van Alstyne replied that class size rises above ten, recitation and lecture methods are on an equal par educationally. He also explained that statistics show that the mathematics is definitely less than the previous year’s recitation classes. Finally, in the issue of the promotions, Mr. Heveltall added to the conversation, which was concluded by the faculty for the admission of underprivileged students.

The decision to increase room rates was passed. As proposed, the cost of double rooms in Morgan and Daniels was raised $1.50 and the cost of the single rooms in Morgan was raised $1.00. The decision to change was made for Ryle Hall. The decision to raise tuition fees was decided in favor of the student body. Concerning the finances of the Institute, it was reported that the Institute had the resources to provide a steady income for the future. The problem was to cultivate these resources to gain from them maximum income. Concerning Allen Laboratories, President Sturke expounded upon the technical and financial value of the research center. He said, "The Allen hydraulic labora­ tories can more than support itself."

It was announced that April 10, 1969, has been set as the grand opening for the new residential Center complex behind Morgan Hall.

The meeting was concluded by the presentation of a report to the Intercollegiate Council President, Prof. Stelnak. Stelnak divided Tech students into the student council, the Senate, and the Technician. He recommended that the latter be the more prevalent of the two. (The text of this speech will be published in TECH News.)

In addition to developments in student unrest, Assistant Dean announced that John E. Hos­ seck, '66, Albert Dement ‘71 and Bruce Forbes were selected by the W. P. I. Alum­ ni Club’s alumnae, thus making the Board of Trustees. The College Board will act on this in June.

Questions Posed to Pres. Planning Group

The Trustees of Trinity College in Hartford, Connect­icut, have enacted plans to immediately begin coeducation at the college which has been strictly male for 146 years. The plan is for a 3-2 ratio of males to females for four years, the Trinity Tripod announced in its January 19th issue.

Fifty female transfer students and fifty freshmen coeds are the suggested enrollment goals for next fall. The final campus population will be one thousand men and six to seven hundred girls.

At the same time, the first exchange students from Vassar had arrived and were under the same regulations as the male students. The Trinity students who have gone to Vassar are under Vassar's regulations. The Vassar girls at Trinity will have no curfew and will be free to eat where they please, including dining at fraternities which offer them social memberships.

The Yale College fraternity has eliminated all academic credit from its ROTC program and turned it into an extracurricular activity, UMass's Daily Collegian announced in its February 12th issue. Military officers teaching ROTC will no longer possess the title professor. One pro­fessor commented, “R.O.T.C. is like singing in the whif­flepops — a perfectly fine activity, but one we don’t think merits any academic standing.”

Dartmouth college faculty has limited ROTC credit to two courses and has warned that unless Congress changes the program it will eliminate all credit. Only the senior officer in each ROTC department will be granted faculty status.

The Worcester Daily Telegram of Feb. 5th reported that the Harvard University faculty has voted to abolish academic credit for ROTC and asks for the appointments of ROTC instructors to be terminated after the current academic year. It also asked that ROTC be denied the use of university buildings and that Harvard money replace any ROTC scholarships affected.

The place of ROTC on campus is a debatable subject. Academic credit is its value is very questionable. But the uni­versity or college should be a place which reflects the out­side world, and which is concerned about the world’s prob­lems. The question of the use of military force is one that must be removed from the college. The answer is to permit ROTC to remain only if it includes speakers representing all viewpoints on the use of military force in its courses.

I.P. — “There is no doubt in my mind that the revolu­tion of black students which is a part of both the general student revolution and the wider revolution of black Ameri­cans, has been entirely justified,” former Central State University President Harry Groves commented recently. “Nothing else would have reached an obtuse power struc­ture. The frustration of fighting to make a world safe for a democracy which did not exist for them at home has been the never-ending role of the black American soldier.”

He also said that black students for years have been subjected to a poor quality education, “especially in the segregated schools and colleges of the South. Although the black student in the North received a better education, it was at the sacrifice of nearly everything black in his cul­ture.”

“What black students are asking of black colleges is nothing less than the transformation of many mediocre and poor institutions into good ones ... continued student pressure in the form of demonstrations may well be self­defeating. It is absolutely essential that black youth have the wisdom to distinguish the kind of revolution they have made and are capable of making from nationalist revolu­tionaries ... It is more easily compared to the kind of revolu­tion demanded by whites in prisons. (They cannot win by force for they are only an island surrounded by numerical force far greater than theirs.) The need now is for a time of relative tranquillity to effectuate the changes the revolution has rightly demanded.”

INTERCOLLEGIATE COUNCIL PROPOSED

By Dave Hebbi

mention intercollegiate coor­perate endeavors in Worcester and in many of the Sloan or elsewhere, Intercollegiate Week is extended to mind. But, to the student council at Becker Jr. College there exists the idea of an Intercollegiate Council which will fulfill the needs of college students in Worcester. Although not a new notion, Bruce Forbes, president of the B. C. J. student council, believes that the intercollegiate council will take the ini­tiative to form such an organization. From this it is exactly what he has done.

The first meeting was held last December and was attended by representa­tion from area colleges, but their support was not encour­aged, "I am a positive think­er," he stated, "and I believe that the colleges of Worcester want and need to cooperate with one another. In a week or two, I plan to personally contact each president of the student government at area colleges and in this way I will get a feel for what is going on. For the Decem­ber meeting we (the B. C. J. student council) sent letters to each student government, and got a good response before the sched­uled meeting."

Forbes also felt that the date of the meeting was not a good choice since the January meeting was held before the new semester began.

Forbes also felt that the date of the meeting was not a good choice since the January meeting was held before the new semester began. Forbes also felt that the time of the meeting was not decided.

It was felt that cooperation will increase the main purpose of this meeting, and that the council will be a de­bate on the need for new college inter­vices and to establish a forum of ideas. In this way prob­lems can be solved. In this way prob­lems can be solved.

Structurally, this organization will consist of two main groups, one for 4 years and the other for 2 year schools. A teach ses

(Continued on Page 7)
Mr. Bond states that the Worcester Police Department spends 99 percent of its time tagging illegally parked cars. We telephoned Precinct 1 of the Worcester Police and asked about this. We were told that there were 400 officers and men in the Department of which, on a normal business day, a mere 40 would be in a position to ticket an illegally parked auto. Our arithmetic gives us 16 percent and not the exaggerated 99 percent Mr. Bond suggests.

Mr. Bond accuses the Worcester Telegram and Gazette of not having the "guts" to print his letter but discounting it, and of protecting their "friends" in the Police Department. We also telephoned the Worcester Telegram and Gazette and had a lengthy discussion with the editor of the Peoples Forum. The letter which Mr. Bond says has been filed in the basket was produced and read to us a few seconds after we had asked about it. The editor told us that a letter would not be published for any of the following reasons: if the content of the letter is libellous, for which the newspaper can be held responsible; if the letter is unsigned, however, they will withhold a name upon request; if the letter is not considered by the editor to be in the general interest of the reading public; if the letter suggests that its author has "problems," such as a "personal axe to grind," etc.; and finally, if the letter contains a "sleazy, foul or discriminatory language." It was for the last three reasons that the Worcester Telegram and Gazette did not publish the said letter written by Mr. Bond.

Mr. Bond's letter was finally published after it had been edited so as to bring out the main points and delete the "unnecessary verbiage."

Finally, Mr. Bond states that the Tech News does have the "guts" to print the "truth" and is not out to protect "friends." However, in the very same issue of the Tech News, the department editor states that he has been too much of a "friend" to the Student Government President and for that reason, may not have critically examined the work put forth by that body.

Respectfully,
Georgia E. Milhappen
Kenneth C. Amend
Arv Nepararas
Warren G. Anderson

Many thanks to Nils, without whose timely assistance this issue could not have been published.

**RCA On Campus Interviews**

for Engineering

Rotational Programs or Direct Assignments

Feb. 18

BS and MS candidates in Engineering can talk to RCA, on campus, about our Engineering Rotational Programs, Manufacturing Management Development Program or Direct Assignments in the area of your skills. Openings are in Research, Design, Development, Manufacturing Engineering, Purchasing, or Materials Management. See your placement officer to arrange an interview with the RCA Representative. Or write to RCA College Relations, Building 205-1, Cherry Hill, New Jersey 08010.

Planning
(Continued from Page 1)

objectives? This can best be explained by telling you about some of the things the Group is currently considering.

For the present we are assuming that the Institute will remain a privately operated school with primary emphasis on a technically based education. Thus, we seek objectives which are consistent with the justification for having a private sector in education, with the resources available to the Institute, and with the needs of our society. For example, some of the overall objectives might be:

1) Concentration on preparing students with a technical background for work in any of a wide variety of specialized postgraduate programs at other schools or subsequent training by industry — a pre-graduate school with emphasis on teaching the student how to learn and a minimum emphasis on acquisition of specific techniques.

2) Development of the middle college area. The Institute would develop programs for taking students with, say, two years at another college or junior college and educating them through the Master's degree.

3) Development of a program designed to familiarize our students with the problems of fitting technical progress to the needs of society. Relations between technical progress and society's needs are currently being handled by people with too little understanding of the technical world, while technical decisions are made by people with too little understanding of the sociological consequences.

4) Concentration on education of the culturally underprivileged. The need here is clear. The question is one of capability and resources.

These are just a few of the eleven possibilities currently under consideration by the Group. Each has to be evaluated in terms of the resources of the school — money and talent; the present public image of the Institute, the national need, and the competition from other institutions. After that comes the development of curricula, faculty, financial backing, and the seemingly endless list of facts which are Worcester Tech.

Future Educational Policy
General Plan For Action

1. Quality strong objectives, economically administered, in a relatively few nationally-important areas, here with become our guiding principles for both graduate and undergraduate programs of study.

2. Areas of graduate study and research will be limited. A scope of approximately ten areas is suggested.

3. The non-technical courses designed for the four new bachelor degree programs will be effected in the most economical manner, to meet generally the student requirements, which will evolve only through experience.

4. Every possible effort must be made to reduce by up to 37% the number of undergraduate courses offered and to increase the average class size to at least 30. Courses retained must be those which best complement and serve the nationally-important areas of study selected.

5. Financial operations in the computer area will be carefully surveyed and analyzed, toward their consonance with the posture outlined above.

6. Promising areas of additional income will be fully developed and/or sought, i.e., Alden Research Laboratories, a well-paying evening school, associations with paying commercial enterprises, etc.

7. Advantage will be taken of all possible appropriate programs available in other Worcester colleges, to avoid duplications of our means.

8. Cross utilization of faculty and of equipment, and of labor and cross enrollments of students among Worcester colleges will be affected wherever efficiently and economically feasible.

9. Cooperation and affiliations with other colleges or institutions, either in or outside of Worcester, will be actively considered when they show promise of effecting increased efficiency and economy in our educational processes.
The Worcester Punch—A Leftist Underground Monthly

By Joseph Lisiecki

"We shall do all in our pow­er to keep truth and morality in the high­est sense and to do our best to carry on from our charac­teristic structure—and thus, of necessity—our particular pub­lication, or, better, a rebel paper—has any gone wrong with a good word re­bel since 1978?"

So begins the editorial policy of the Worcester Punch, an under­ground newspaper, the Worces­ter Punch. The self-proclaimed "setting an example to our strug­gles through typical under­ground political analysis (money, or rather lack of it) to publish typical underground truth (anti-establishment with particular appeal to the hip culture).

To entice you better with Punch, I'll first introduce some of the staff as listed in the pa­per. The Managing Editor is Frank Dudock; Assoc­i­ate Managing Editor is John Sevivas; Spiritual Advis­or, is Rabbi Menasha; and a very special person con­cerning the people list­ed here are that they are just ordinary people, and aren't we all?

News releases are supplied by Underground Press Syndicate (U.P.S.), which is a rather loose organization bonded by a g r a d e x change of news among the 100 odd underground papers in the U.S. and Canada. Liberation News Service (L.N.S.), another source of information, is a definitely organised group of about 12, who send out news packets from their New York based office. News items are sometimes used from the New York Times and the Guardian.

Punch does, in fact, carry on the tradition of the rebel, at­ tempting nothing less than a moral revolution by exercising the right of free speech and general criticism on the "establishment."

L.N.S & U.P.S news items are arranged in a regular column titled "Bugging the News" by Frank Dudock. The result is an interesting amalgamation of resis­tance inconsistencies and factual information in other press coverage. Usually you can find little embarrassing facts that prominent people would like to cover up so as not to stir up controversy in Frank’s column.

Another regular is John Sev­ivas’s SDS report. John, Assump­tion SDS organizer, reports on his group’s activities in the Worces­ter Area. Part of Punch’s appeal is that they have involved support of controver­sial groups such as SDS. Mem­bers for Adequate Welfare, and Black Panthers, or at least gave them space to print their own views. In doing so, the pa­per has a certain authenticity of honest information concerning the aims and policies of these organizations which are seen­sored view hazily rebutted by most of the establishment.

An informal interview with Menasha Billey in the contem­porary intellectual atmosphere of the Paperback Center in downtown Worcester gave an even closer view of the nature and mission of Punch. A first

they got it by screwing their workers. Profits are made by skimping off of other people’s earnings to get extra for them­selves.

"Capitalism is based on mutual antagonism instead of mutual cooperation, and when these antagonisms become great enough, the whole system pulls apart. Capitalism is based on the antagonism between the worker, and owner, the rich and the poor. I could supply you with a list which I call ‘competition’, but that term leaves a lot out."

Political Opposition: It just may come to (dictatorship) here, because as the young peo­ple, the poor people, and the black people become more and more influenced the government, especially with conservatives like Nixen and Agnew, might just decide to use Agnew meth­od on them down, and that means use the police. The sit­uation would gradually escalate into a civil war, if it ever came to that, whatever dissent there is against the system would be ruthlessly put down, no questions asked. They’d open up new corporations, machine gun people down, because those who are in power want to stay there.

Military-industrial complex: It’s considerate that those in power here are also those who have everywhere! The same people who advise the president’s cab­inet about war, are the ones who own the arms factories. It’s the military-industrial com­plex, and they want to stay in power and make money. As soon as they feel they are real­ly threatened they are going to be awfully oppressive.

Laws on sex and drugs: "There should be some mech­anism to insure that children shouldn’t be taken advantage of. But as far as it concerns people who are old enough to know what they are doing, there shouldn’t be any laws at all on sex and drugs."

Freedom of the Press: "Under­ground newspapers face har­rassment from law officials, very of­ten only for political reasons. They’re just harass­ing them because they don’t see the viewpoint they print. It’s antagonistic to the power structure."

"There was a report in L.N.S. that one of the people on the Florida Free Press had the sheriff say to him, ‘We don’t want any more newsletters up here. Get out of town!’"

One step to a fascistic or dic­tatorial government for our country is that people who are entrusted with power here are also those who have oversight this suppressed and the one that I considered to be the most important, was the problem of competing with each other, especially in terms of sales and profitability. It’s the military-industrial com­plex, and they want to stay in power and make money. As soon as they feel they are real­ly threatened they are going to be awfully oppressive.

Laws on sex and drugs: "There should be some mech­anism to insure that children shouldn’t be taken advantage of. But as far as it concerns people who are old enough to know what they are doing, there shouldn’t be any laws at all on sex and drugs."

do destroy humanity ultimate-
ly."

Hopefully you are now better acquainted with Punch's views. They may seem radical, but a better word may be "idealist-	ic." There seems little doubt that the status quo is unjust, and many changes should be re-
necessary. Punch attacks the in-
justices as its staff sees them, asking for peace and humanity. Peace can be obtained by sim-
ply not fighting and human jus-
tice by being humane — ideal-
method to attain ideal ends.

The biggest trouble may be that we are not ideal beings. Nevertheless, Punch remains steadfast in its faith in man-
by pursuing such a policy.

No doubt, almost everybody will claim to support its ideals and Manasha explains Punch's condensation of insti-
tutional hypocrisies: "... just about everybody and his brother gives lip service to these same ideas. The church gives lip service to these ideas, but they're in the business to make money themselves, so they give it only lip service. Sure, Punch is full of protests, but that's because we're against all these views as establishment writers, Manasha Bilsley (left), Associate Editor, and Frank Du-
beck, Publisher and Editor of Worcester Punch."

Columbia Gas
Energy Engineering
has opportunities for you in

- Research Studies
- Development
- Systems Optimization
- Consulting on Industrial Processes, Structures, Materials, and Heavy Equipment
- Engineering Analyses

There's excitement waiting for you in energy engineering, on a range of projects which press the limits of your chosen specialty. For example, prototype development of thermal systems and devices, fully automated com-
pressor stations, fuel cells, corrosion studies, and analyses of community and regional energy use patterns.

Columbia's engineering in breadth offers you immediate challenge in improving radiation characteristics of ceramics, miniaturized resi-
dential furnaces, massive ultra-high-temperature industrial units, welding processes, and optimized total energy systems for large fa-
cilities... and further challenge in consulting to appliance manufacturers, high temperature processing industries, and to the far-flung modern technical operations of the Columbia Gas System.

You get the idea. It's hard to put fancies around the excitement waiting for you at our Columbia laboratories. Natural gas provides over one-fourth of the U.S. fuel needs, and we're involved in the design of residence, industries and Columbia is a leader. For in-
formation on our growth opportunities for you:

Meet on Campus with Our Representative Wed., Feb. 28
Mr. Stanley A. Rogers
Assistant Director of Placement

Developmental Reading
Offered

The English Department will offer a course to all students and staff members during the second semester. Richland's course is developmental reading designed to improve reading efficiency. This course will meet twice a week for one hour, and will be offered at no cost to particip-
nts. No credit will be given.

Anyone interested who could not come to the preliminary meetings may contact the Eng-
lish Department Office in SL 315. (Phone 246).

This course is designed to im-
prove reading efficiency: that is, both speed and comprehen-
sion. The course will meet Wed-
nesday at 4 p.m. and Monday, Tuesday, and Thur-
(s at 3 p.m.)

Draft
(Continued from Page 1)
litical, philosophical, and per-
sonal moral codes and beliefs were said to be critical in the approach.

A second lecture presented by Dr. Harvey Chernoff of the Boston State College Panel described a system in opera-
tion today for professional medical education. The system is comprised of screening coun-
ers, who question prospects for medical or psychiatric ex-
aminations, and either reject their plans or approve them. Those who are referred are one of two doctors on the panel who examine them and write our a report of their findings. The reports can be presented as legal evidence to local draft boards.

Dr. Chernoff emphatic-
ally stressed the use of proper language in these reports to the boards. The language should comply with that of the SSS booklet AR 40-81 which is used to present medical deferments are dis-
ussed.

Overall this series of lectures and workshops had one major objective, to make known the existence of the numerous Draft Counseling Centers scattered throughout New England and the ease with which students seeking advice may obtain it. Perhaps the most important point made in the meeting is the fact that draft boards as-
sess you are aware of your rights, and the other legal stipulations involved. As is the case in most instances, how-
ever, the individual is unaware and files form after form with-
out any legal advice. If this is your case, whether you are a freshman or senior, perhaps the time has come to take action.

For more information write to the Worcester Draft Information Service, 386 Main Street, room 326, call T55-8729, or drop by the office ten a.m. to 4 p.m. weekdays. Lists and ad-
dresses of various other coun-
seling organizations may be ob-
tained from Alex Forcina, Medical student.

betrothed to take it in the two years it was offered. And they had
n't been able to prevent the wave of revolution that had
drenched the black ghettos in 1973 — organized riots, striking into white neighborhoods, that had
elected George Wallace. He re-

The course will be held by
in the right in '74 and how they had

nevertheless, the blacks per-

made the coup by the far end of China sub-
sequently. By then, the last

war was inevitable. Lot of good that black history course had
done in understanding the black problem.

College was the place to get by and earn a good degree to
got a good job. A place to have parties and find some girl to buy — as long as that
girl didn't trap you into having to

marry her. But even that —

you had to settle into a hard

sometime. It was the thing to
do. Thank God, if he had sur-

vived, Tech had never had many activists who protested the military and war and were always so upbent about nuclear weapons, who had always been ready to picket and bother people about the poor and the black. He preferred to forget the massues. In those days he could.

Next morning, before the moh

awoke and resumed their frenz-

ised dance commemorating the war, and the epidemics and famines that followed, with those they held responsible —

usually any college-educated person — leading them dancing on air, he asked his neighbor why he had thought of Tech the right before. Tech had been so

unconnected, so unconcerned with what was happening in the world. Why should he think of his student years there now that the world had collapsed? Why?
TKE Celebrates Anniversary

On Friday January 18, 1969, Zeta Mu Chapter of Tau Kappa Epsilon fraternity celebrated its 70th anniversary. The occasion was celebrated by a cocktail hour at the chapter house followed by a banquet at the Castle Restaurant. The festivities, planned by Bob Ehrman, were attended by 30 brothers, pledges and guests. Following the dinner, short speeches were given by main speaker, Thomas Ehrman the province supervisor, and also by the president of the chapter, Jeff Hynds.

Thursday, February 13, explore an engineering career on earth's last frontier.

Talk with Newport News On-Campus Career Consultant about engineering openings at world's largest shipbuilding company—where your future is as big as today's brand new ocean.

Our backlog of orders running for years ahead means competitive starting salaries, career security, with your way up wide open. It also means scope for all your abilities. We're involved with nuclear ship propulsion and refueling, nuclear aircraft carrier and submarine building, even automation. We're a major builder of giant water power and heavy industrial equipment. We're starting to apply our nautical nuclear know-how to the fast growing field of nuclear electric power generation on land.

Interested in an advanced degree or research? We're next door to Virginia Associated Research Center with one of the world's largest synchrotrons, offering advanced study in high energy physics. We're close to Old Dominion College and University of Virginia Extension Division, where you can get credits for a master's degree, or take courses in Microwave Theory, Solid State Electronics, Nuclear Engineering and other advanced subjects. Ask about scholarships, tuition grants, and special leaves to implement these study and research opportunities.

Ask, too, about the pleasant living and lower living costs, here in the heart of Virginia's historic seaside vacation land, with superb beaches, golf, fishing, boating, hunting.

IMMEDIATE ENGINEERING CAREER OPENINGS

Thursday, February 13

He'll be at the Placement Office to answer questions, discuss qualifications, take applications for fast action.

TCH NEWS

Excerpts

(Continued from Page 1)

which often lead to violence or the destruction of property.”

“Our appreciation to fellow trustees Robert Biaggi for his idea and his initial draft. Of course, we at that time felt we need for the statement on our campus, but we did feel that some reputable college should articulate what so many of us—students as well as the older generation—are now feeling.”

“This fall, the news media has been filled with accounts of Students for a Democratic Society throughout the nation. A meeting was held this fall on the campus, at which SDS members from other colleges (invited by our students) explained their program to a number of interested Tech students and then were thoroughly grilled from the floor. As a result, our Tech students didn’t accept the SDS program. They did, however, feel that students should take an active and constructive part in helping to alleviate some of our social ills, so they formed their own organization known as the Committee of Concerned Students.”

“A main issue among students, judging from letters in the Tech News, is ROTC. Doubt this will continue to be a subject of controversy as long as ROTC remains on the campus with any compulsory aspects. The change this year to require Military Science in the freshmen year only has worked out well for the ROTC program in general. There are insufficient numbers of sophomores taking the course as an elective to insure a continuation of the advanced program in the coming year.”

“Plans for the new residential center are proceeding nicely, after a relatively minor setback caused by the necessity for changing architects, since our original architect became ill and had to withdraw. However, his basic plans are now being completed by O. E. Neult and Sons of Worcester, the a m e firm which did such splendid work for Tech in the Gordon Library. Groundbreaking ceremonies are planned for April 16 at a Thursday morning assembly period. More details will be available on this as the time approaches.”

“Computer usage continues to grow as the Worcester Area Computation Center expands its activities into new areas. Tech has been and probably will continue to be the heavy user of WACC. However, under Dr. Ron- dahl’s dynamic leadership, the center is seeking new activities which will bring in revenue producing business to provide the necessary back-up support when our original NFS grant expires after the third year.”

The IBM 36-44 computer at WACC is now in use approximately 72 hours a week compared to 36 a year ago. The center is open 72 hours a week, and at times it has been necessary to extend this schedule. During one week in January the computer was not shut down for three days. It is certainly proving its worth as a vital educational tool. We expect to further capitalize on the investment of talent and equipment by establishing a graduate program in computer science.”

(Worcester, Mass.)

WE CHALLENGE YOU

to question us concerning all matters of Jewry and its relationship to the modern era

Refreshments will be served

---

Parking lots are places where people bang up car doors.

Help wanted:

Can you design a door that eliminates this problem?

**Situations:** It is often difficult to get into and out of today's cars without bumping into the car beside you.

**Question:** Can you design a door that uses minimum OUT-OF-SPACE when opening?

**Disciplines:** It can go over the car, under it, slide into the frame, swing parallel to the body ... AS LONG AS IT'S NOT TOO EXPENSIVE TO MASS PRODUCE. Door must also provide an electrical channel to the chassis to provide for power operated windows. Need your ideas in time for meeting next month.

**Thanks.**

Want to work on a challenging assignment like this? A new member of an engineering team at Ford Motor Company does. Today his job may be designing new car door hinges. Tomorrow it might be solving Nyquist vibration in semi-trailer trucks. Or designing a different approach to vehicle controls, or even developing a new engine configuration.

To help solve assignments like these, our people have a giant network of computers at their service. Complete testing facilities. The funds they need to do the job right.

If you have better ideas to contribute, and you're looking for challenging assignments and the rewards that come from solving them, come work for the Better Idea company. See our representatives when he visits your campus. Or send a resume to Ford Motor Company, College Recruitment Department, The American Road, Dearborn, Michigan 48121. An equal opportunity employer.
Adelaide Woodwind Quintet, which will perform at the Worcester Art Museum next Sunday, Feb. 16th, at 3 P.M.

Imbibing Society Chartered

The Management Engineers have formed a new drinking society on the hill. The "Gents" total six and are headed up by grand beermeister Dave Lieberman. Other officers are beermeister Dan Lipman, barman Joe Doran, and treasurer Osby Means. Their unique drinking outfit consists of top hats, black dress-vest, black bow tie, and black walking sticks. Dan says his group was chartered on January 15, and meets once a week. Admission to the society is, of course, very selective. So Techmen, if you ever see a black bow-tied, top hatted engineer staggering around the campus, drop him off at the steps of Salisbury. He may just tip his hat to you.

Only 66 more shopping days until J.P.

“Enjoy a brew in a relaxing atmosphere”
Tech Basketball Ends Skid; Drops Visiting Tufts 70-48

After five games, Tech finally broke the losing habit with a 70-48 victory over Tufts College. The team displayed a new hustle, along with a set of new uniforms for the rather small hometown crowd.

Leading Tech in scoring was sophomore Tim Rooney who's driving lay-ups brought baskets and fouls for a total of 10 points. Behind him was senior Ed Griffith with 14 points and Ollie Briggs with 12.

Tim Rooney Hits For Two Points

The Worcester Tech varsity wrestling team showed its capabilities in its last two outings by overpowering Tufts University last Saturday, 30 to 14, and Williams College 27 to 10 on January 13. With these victories, the first time Tech has beaten these two teams in the past five years, and the win over Brandeis, the Tech grapplers now stand at 3 wins and one loss on the season.

The Tufts match was highlighted by the return of Fred Snyder, who has just rejoined the team. Powerful Fred easily overcame a rugged opponent by pinning him in a mere one minute and 34 seconds.

As the meet started, Tech got off to an easy lead when Steve Sweeney (115) and Bob Grillo (123) each won by forfeit. In the 130 lb. class, co-captain Len Ny Politzonto, easily pinned his opponent in 2 minutes and 27 seconds. John Sansone, in the 137 lb. class, had a tough break as he lost a 5 to 4 decision due to riding time. The score at this point was 15 to 3 in favor of Tech.

Rather than cause all Phil Warren to possibly sustain fur-
ders with 13 grabs. He was followed by hustling co-captain Tom Gurney with 2.

The first nine minutes saw a cautious and deliberate game by both Tech and Tufts. There were 60 seconds, Tech moved out to what proved to the deciding factor in the game scored.

The action began with Tech trailing 14-13 when a shot by Steve Watson racked up two. The quick moves of Rooney resulted in a steal and then set up Eddie Griffith with another

Mermen Overcome: Lose Meet 58-37

A powerful Coast Guard swim team made it a clean sweep Saturday defeating the W.P.I. varsity mermen 50-27 after nip-
ing the frosh squad 43-42 earlier.

Despite an early, rather im-
pressive 31-14 lead, the varsity fell to the strong depth and dis-
tance swimmers of Coast Guard.

The freshmen set several rec-
ords but a disqualification could have cost them the meet.

In the varsity contest, the WPI won the 400 medley relay with Roger Johnson, Carl Graf, John Pelli, and Tom Weil, and in the process established a new school record of 4:12.

Mike Laska easily won the 200 yard freestyle in 2:10.8 while Pete Dauplens third. Following a close 60 yard free event with Tech sweeping first and second and Jim Georgia and Lou Zit-

10-93

In the freshmen meet, Al Had-

set, Pelli and Weil respectively.

Johnson manned a close reg-

in the 300 yd. backstroke broke Coast Guard swept the 500 yd. freestyle with Tom Zarl-

third and the 200 yd. breast-

stroke with Dauplens third.

WPi finished out the scoring by winning the last event, the 400 yd. freestyle relay with Mike Laska, Ziney, George, and Weil.

In the freshman meet, Al Had-

is won the 200 freestyle in 2:10.8 and the 500 yd. free in 5:32, a new freshman and post record, and anchored the winning freestyle relay.

Dick Ellis won the 60 yd. freestyle with a new freshman record of 20.3 and the 100 yd. free with a new record of 33.4 while also swimming the free relay.

Other winners were Randy Patridge, diving, and Bruce Eileen 200 yd. breaststroke.

An important event in the freshman meet turned out to be the 200 yd. butterfly where it appeared Steve Diquette had won, but was later disqualified for an illegal kick. A win here could have won the contest for the Chip, 47-46.
