Masque Offers ONE ACT PLAYS

The Masque, Tech's dramatic society, has chosen to do three short plays for its upcoming presentation in May. The plays will provide a variety of parts to play, and anyone interested in participating with The Masque is asked to contact Jim Atkinson or Bob Rosen­berg at A2P.

The three plays are Eugene O'Neill's "Where the Cross Is Made", and Edward Albee's "The American Dream". The third play has not been definitively selected yet, but indications are that Bob Rosenberg, Masque President, is leaning toward a play entitled "Moon­set".

"Where the Cross Is Made" centers around a credibility of stories told by a mad ship captain and his son. The captain, gone insane after losing his ship and staring on a deserted island, has fixed up his attic to resemble a cabin, and writes regularly for a ship he has fitted to return with a treasure that he says he discovered on the island. Whether the trea­sure is a reality or illusion of the future, becomes more and more an issue until the captain drives his son mad as he draws him into the game going on in his mind.

Although at the time of this printing a copy of "Moonset" was not yet available, it deals with the attempts of six soldiers to escape from behind enemy lines. In Edward Albee's own words, "The American Dream" is an examination of the American Scene, an attack on the substitution of artificial for real values in our society, a con­demnation of complacency, cruelty, evacuation, and va­lidity; it is a stand against the fiction that everything in this slipping land of ours is peppy­keen.

The main character in this play are Moonny, Daddy, and Grandmu. Each character is adorned with the common idio­syncracies of his part in the nuclear family. The play, as are the other two, is one­act, and the scene is an apartment with a kitchen "door".

The satirical morsel with a dramatic aroma. An (Continued on Page 5)

Save Your Blood

The American Red Cross Bloodmobile will be on the WPI campus March 11, 12, and 13 at the Morgan Hall lounge. Mrs. Mahoney and Leo Janson will act as coordinators. The center will be open from 11 am to 5 p.m.; however, parental per­mission slips must be filled for stu­dents under twenty­one. Fresh­men and sophomores will be ex­cluded from Physical Education class on the day that they give blood.

Frataternity and Dorm repre­sentatives have permission slips and further information. Those representatives are: Dorm · Bob Williams, AEPi · Alan Shapiro, ASGC · Ray L. Showyra, DET · Mike Hughes, LCA · Gerald Pie­rper, PEO · Jack Struka, PTK · John Anderson, PSK · Peter Welsh, SAE · Dwight Eddy, SPE · Stephen Kostergaran, SP · Dan­iel W. Lewis, TKE · Mike Hitch­cock, TC · Mike Sullivan, and APhi coordinator · Bill Drake.

Dread Track noted that 250 pints were given last year, but for a school of 1900 students a goal of 300 pints is reason­able.

W.P.I. Institutes Graduate Plan In Computer Science

The report of the President of United States Science Ad­visor's Committee, entitled "Computers in Higher Educa­tion" opens by stating that the field of Computer Science is receiving more and more attention as a field of study. A Wisconsin’s "$10,000 A Year Award" is the latest expression of the fact that the field of Computer Science is one of the most important aspects of today’s technology. Worcester Tech, in response to this chal­lenge of the future, has instituted a Master of Computer Science Degree in Com­puter Science. The program is headed by Professor Norman E. Sondak, Professor of Computer Science and Director of the Worcester Area College Com­putation Center.

The demand for educated, In­terested personnel in the field of Computer Science is created by the fact that there are presently more than 60,000 com­puters installed in the United States and conservative esti­mates indicate that more than 100,000 will be installed by 1975. There are approximately 300,000 systems analysts and computer programmers at work today. By 1975, almost six times this number may be re­quired to man the evergrow­ing number of operating comp­uters. Other large requirements exist for educated personnel to plan and develop manufacturer's software, to direct applica­tion research, programming, and so for people in Computer Science education. The outlook for growth after 1975 is equally staggering. Computing is, and continues to be, one of the world’s fastest growing areas of scientific development.

Worcester Tech’s program, which begins this Fall, is the first in the area to offer graduate studies in the important and expanding field of Compu­ter Science.

The benefits to the Institute from the establishment of a graduate program in Computer Science are numerous. The school’s reputation will be en­hanced by being in the forefront of another major area of science. A graduate program will help to insure that under­graduate Computer Science pro­grams will be of the highest quality. The Graduate Student Committee of the Faculty, chair­ed by Professor W. Gregson, Electrical Engineering Dept., is presently in the process of studying an expanded under­graduate program in Computer Science. The graduate pro­gram in Computer Science will make available skilled and knowledgeable personnel in this field to support all the engi­neering, scientific and humanities disciplines at Worcester Tech and the other area colleges in the right of the door was a sign, "Black Student Union," with a black, red, and green tricolor beside the words and a black hat beneath them. Under this sign was another, The trustees say, "Let’s keep the tradition." We say the tradition is Racism. Over the central door was a picture of Malcolm X, with a "Black Power" sign beneath it. Other signs commented, "50 Blacks in the Class of ’73," "Proper channels have failed!" "We Want Black Students Not Tokenism," and "Black Loy­alty Liberal or Racist?" Newspaper, radio and TV men sur­rounded the front, while behind a n a group of blacks In the mass media wondered students, reporters from Clark, but with many from Tech and other local colleges. A policeman was watching an unmarked car, refusing to be photographed.

The Clark students interview­ed expressed total surprise that this occurrence had occurred. A unanimous sentiment existed that police should not be called in, as, indeed, they never were. One girl commented, "I’ve seen police action and it’s not a pretty thing." A majority seem­ed to sympathize with the Black Student Union’s demands, but many felt, as a member of the student government did, "They occupied the building before they tried to go through the available avenues." Another student commented, "I sort of sympathize with the students at Clark. I thought the channels were adequate." Some felt that it was a "local problem". Some would have won their demands with more patience at balance, with (Continued on Page 5)

Clark Black Students Take Over Building

The brick building looked like an apartment house, with its three doors. Normally, there is little outside to convince you otherwise; other than a sign listing Clark administrative offices that are located in the building. But, from 8:45 Thursday­morning to 4:45 that night, the front door was open and white students and others outside a window. On

TKE Sponsors Contest

A Snow Sculpturing contest will be held on Saturday, March 1, as a part of Winter Weekend. The contest is open to all frat­ernities, bands, and any group of independents who wish to build a sculpture. The sculpture may be limit­ed in size. However, it must be covered with ice or snow. Judg­ing, which will take place at 10:00 A.M., will be based on originality and appearance. The judges will be Dr. Heverney, Dr. Stewart, and Col. Geo­ney. A silver plate, donated by Joe Kappa Epilson, will be awarded to the winner at halftime of the basketball game.

The Tech News

Worcester, Massachusetts, Wednesday, February 25, 1969 Number 3
In writing this particular column, I feel uneasy using my column's name, for I cannot grok this week's subject (not this week's grok answer). I cannot completely understand the feelings and the plight of the black man in this country, more than three centuries of oppression. I cannot become a part of the black race and really understand what they experience, primarily because, as most Americans are, I am color-conscious. As Eric Hoffer commented on a CBS News special "If Jesus Christ was a black man and you met him, you'd see the black man first and Jesus Christ second." I am white and have experienced the benefits and generalнe sense of society, not the defects and injustice as the black American has.

Keeping this in mind, I cannot condone the occupation of the Clark administration building by Clark's and Holy Cross' Black Student Union. The Black Student Union had not used all the available "normal" channels, such as an attempt through the Scarlet to start a massive student campaign. From all indications, they had not made an ardent attempt to appeal to the faculty, either. This was not a "last-ditch" attempt to arouse support, because there were more channels available, through which they might have persuaded the administration, that they did not try. If a dramatic protest was actually required to arouse student and faculty opinion, a march leaving the campus in protest or a picket line might have aroused this movement, group by group, without disrupting the college. While I recognize justification for the black attitude and feelings that led to this, but not for the action, that represents a breach of law that stipulate that a person at 18 is mature enough to fight, kill, and die for his country, but not mature enough to vote and to participate in the processes that send him to fight, kill, and die. We ask you to support this campaign and to LET US VOTE.

Korean Student Expresses Interest In Western Culture

The Liberal View

by Paul Cleary

The Case For Chandler Stevens

Several weeks ago, the Committee of Concerned Students suggested the name of Chandler Stevens as its designation for a new president. We feel that Mr. Stevens is the type of man that the committee is looking for. Stevens graduated from Georgia Tech in 1956 with a Bachelor's degree in Electrical Engineering, and received his Ph.D. in Economics in 1967 from M.I.T. He has worked as a data processing consultant and in data processing sales, and received the U.S. Air Force Commendation Medal for programming research done for the Pentagon.

Lately, Mr. Stevens has been active in politics. He was the first independent legislator to serve in the Massachusetts General Court in more than 50 years, and has successfully promoted state constitutional reform by sponsoring final legislative passage of the Home Rule and Consolidated Government amendments (1965). Stevens has accomplished all of this and more and yet is only 33 years old. In March, 1966, the Christian Science Monitor quoted Mr. Stevens: "Despite his independence, Mr. Stevens is not exactly a 'loner' on Beacon Hill. He commands the respect of many of his colleagues on both sides of the aisle. Many prominent political figures of both parties have joined with him in petitioning legislation."

The Lowell Sun stated: "Stevens ... overcame both Democratic and Republican opposition for the two terms to which he was overwhelmingly elected. In doing so he made political history ... although comparatively unknown, except in his present four-town district, Stevens has proved to be an increasingly popular leader. He has a distinct and dramatic appeal, especially to the independent voter and the disenfranchised or alienated voters of the two major parties." (December, 1967.)

Thad, Chandler Stevens is a man recorded by many and respected and voted for by the highest caliber. He is young enough to deal with the problems of today's college students, and in view of his
Dorm Committee Instrumental In Improving Campus Life

When the fairer sex take over part of first floor Ritty next semester, the composition and problems of the Dormitory Committee can be expected to change accordingly. Up to now the Dorm Committee has been known almost entirely for its work in obtaining partiality hours. Little has been seen of the efforts of its sub-committee, the Food Committee, and yet together these two committees form a branch of the student government which has worked some important changes on the Worcester Tech campus.

First proposed during the discussions which led to a new student government constitution under Bob Woyw, '68 former student body president, the Dorm Committee is one of eleven committees reporting to the executive council of the student government. It was originally established with the purpose of organizing and implementing an effective system of dormitory representation. The committee chairman is elected by the committee from its junior members each spring. He becomes one of the eleven committee chairmen who sit in the executive council.

This year's Dorm Committee chairman is Jim Atkinson. A senior living on the second floor of Daniels, Jim is responsible for representing the discussions of the Dorm Committee to the administration. Junior Roger Kern is the chairman of the Food Committee. The Dorm Committee itself is composed of the chairman, two representatives from each upper class floor and one from each freshman floor. Dean Trask and food service manager Mr. Thomas also sit on the committee. Their meetings deal with all aspects of dormitory life.

Among the accomplishments of the Dorm Committee is the (Continued on Page 7)

JOIN A LEADER
in the fast growing field of rocket and missile propulsion

EXPLORE the potential for professional achievement at the Naval Ordnance Station, Indian Head, Maryland.

Few technical fields offer you as many opportunities for an exciting and rewarding career as the fast growing field of chemical propulsion. Indian Head in a recognized leader in research, development, production, and evaluation of propellants and rocket propulsion systems and has advanced the state-of-the-art of chemical propulsion through participation in the development of Defense and NASA. Indian Head has made important contributions to the Polaris, Poseidon, and Sidewinder propulsion systems as well as virtually every missile system in use by the fleet today.

A Dollar's Worth

by H.H. Shore, Past Editor, Tech News

I know that we are friends —
I'd always be the first to say it,
Thus wherever I need you
You're always the first to pay.

When I was young you took me around,
You showed me how to win
Then how come now you're so down and out?
It seems like you've been dyin'.

You introduced me to all your pals,
You told me I was in,
Then how come now all your pals are gone
And I'm your only friend?

You once taught me how to live,
You told me about givin' and takin',
Maybe the reason you're useless now
Is that you were always fakin'?

You told me it's respect that counts
Whenever you've got a friend,
Then you steal girl from me —
You always take so much more than you lend.

I used to look up at you
Like you were some kind of god,
But now that I'm here inside your skin
I can see that you're just a fraud.

You say that you need some help,
So you've come over this way,
But every friend, my wallet's empty
You're not worth a buck today.

CCS Discusses Problems Facing Tech Students

The Committee of Concerned Students met last Thursday night in the library seminar room. Only a handful of students showed up for the meeting and their accomplishments were limited by their numbers.

First order of business of the meeting was the matter of proposing a candidate for president of the college. The Committee selected a candidate with liberal views. They then learned, however, that the choice had been narrowed down to two men. Feeling was that the CCS should support a candidate of its own choice.

"Let Us Vote" was the next topic discussed. Glenn White led the campaign to solicit support for lowering the voting age to 18. He suggested obtaining the support of the student government, organizing students in a letter writing campaign to influential congressmen, and perhaps drafting a resolution to gain public support for the campaign.

The committee discussed supporting a candidate for Student body president and resolved to come out in favor of one of the candidates after voting among themselves.

The topic that aroused most discussion was, of course, compulsory ROTC. Individuals offered ideas as to what action the committee might take. The general feeling was that the student body is strongly opposed to compulsory ROTC. Plans for a petition were made, and the possibility of an anti-ROTC demonstration this spring was discussed.

In closing, plans were made for a committee to suggest action in the form of a program to the President's Planning Board.

CANDIDATES EXPRESS THEIR OPINIONS

Student Government
Presidential Candidates

Lenny Polizzotto

Everyone's opinions, as he is obligated as a person to express his own, but most important he must represent and strive for the desires of the majority. The President must be willing to devote a great deal of his time in bridging the gap between the administration and faculty, being forceful yet persuasive in attempting to vindicate his cause.

To make specific promises at this time is a bit unrealistic yet there are many things which I would like to help the students accomplish. The Interfraternity Council and the Student Government must work more closely, each helping rather than fighting and stifling the progress of the other. This is very evident in such areas as Freshtime-10 and fraternity rushing. I would like to see a united front (as such a faculty member) sit with the Board of Trustees at their meetings not only to express student viewpoints but also to relate to the student the views of the Trustees and the reasoning behind their actions. Informal "retrrees" in which students and faculty could discuss anything they felt the occasion to bring up, are in order that the two might become more complementary. I would like to see the student body represent the School in community affairs with the hope that in working together outside the campus we might better cooperate within the campus.

I am sure that there are many things that the students and faculty have in common. We must pool our resources and work together, for the betterment of the students.

(Continued on Page 7)

J. D. Cattell II

Though I personally think bringing the Mothers here would be an interesting experiment.

Tech's arrangement with the Art Museum is an outstanding attempt towards bringing good classics to the Worcester area. Greater contact and cooperation with Tech President, Committees work is the most important part of J.P.

(Continued on Page 7)

Richard Schwartz

In the past year, the social program has begun to move toward better entertainment and a well rounded introduction to the entire entertainment field. This movement must continue. This year's program was aimed at presenting folk, soul, and rock on school weekends. The classical, jazz, and blues were given through the Art Museum and Sunday night concerts. The aim of the new social committee should be to continue, as well as broaden the musical side of the social program. Along with this, I feel there is another side to the social program that either be lectures, films, off-Broadway plays, or even juggling acts, each is a vital part of the cultural life of any student. I have discussed the idea of a Coffee House on campus for Tech students to hang out, dates, and now with the new partials there is a definite need for one.

This year, working on the school social committee, and being in charge of the Buddy Rich Concert, I have had a chance to get the feel of, and to form ideas on what a social program should be. Also I have been publicity and program chairman for the Mosque and am currently and a publicity chairman for Prom, from each of which I have gained experience and useful know how. The major part of any social program is the scheduling, the coordination with other committees, and outlined plan of performances. But still there has to be ingenuity and resource to make an otherwise standard program a success.

(Continued on Page 9)

J. D. Cattell II

Tony Toscano

Over the past year many people have asked the question, Who is Tony Toscano, the social chairman? My answer to this question is that the social chairman is someone who can obtain entertainment which will appeal to the majority of the student body. He should not let his own tastes of a minority dictate his choice of entertainment. The social chairman should not try to shock the student body.

TONY TOSCANO

CANDIDATES EXPRESS THEIR OPINIONS

Student Government
Presidential Candidates

Steven Udell

Technologically, Worcester Tech finds itself in a very awkward position. The students that enter school are not necessarily students that were here five or six years ago. Today's students are more aware of himself and the role they play in the school and his environment. For this reason he has more interest in the school's political structure. Student Government is the place where the student discusses topics relating directly and indirectly to himself. Different committees have been set up to handle these different topics, yet the present committee system does not involve enough students. There is the need for more student participation and readily available records of all committee meetings. Therefore, if elected, I will give every student the chance to be actively involved with these committees through this greater interest, the faster and more efficiently these committees can operate.

In the past three years, there have been many progressive changes on this campus. There is a great need to continue this progressive thinking in our attempt to keep Worcester Tech at or near the heart of the changing generation. I feel that when confronted with varied situations I will be able to be completely open-minded and choose the best for us. I appreciate student opinion and feel that it is the key to an effective government. This opinion must be conveyed to the students in such a way so that they will know exactly how we will deal with a particular situation.

Active experience is indeed an important qualification for this office. The position of Junior Prom Chairman is quite analogous to that of Student Body President. Committees work is the most important part of J.P.

J. D. Cattell II
One interesting fact was that both those who were against the black demands and those who were for the demands felt that the majority of Clark students agreed with their own viewpoint. A student government member who had organized the demonstration felt that general student apathy towards the issue was indicated that of those students who remained in the buildings, a member of the "Black Cross" commented, "Until the ice freezes over." Noting the chill in the air he added, "Or until I feel better.

The students inside were careful not to touch anything, and the building was still standing. A girl in the window if she could deliver the checks for students who had been arrested to him, told them that they could not come in any way that might later be accused of theft. The Holy Cross students made sure that the remains of what they were drinking coffee were disposed of and left on the ground outside the building.

At 1:30, a meeting was held in Little Commons for all interested students to de- cide what their reaction would be. This was organized and led primarily by Josh Miller, a junior and member of the Clark SDS. The reaction from student govern- ment representatives was dismay over the fact that they had not been consulted, Joseph Jackson and all others who had approached the student government and asked for their backing before any of the actions were being doubled. In addition, the students them- selves of Clark are donating to the

Overall, the actions of the Clark Black Student Union have brought about an improve- ment in the situation of black students at the school. The BSU may have lost some while sup- port by not trying to work with the administration before such actions were taken and by not working with the student government. However, the BSU may have learned a valuable lesson. The administration, on the other hand, has gained prestige in the eyes of the students, who probably see it as a necessity in such a situation. President Jackson and all other ad- ministrative officials have also made no mistakes in the hand- ling of the demands and the occupation. Unlike other schools where faculty members have tended to communicate with students or lack of desire to communi- cate with them, Clark University has come out of the black take- over for the better.

overall point of the threshold of pain? Much more distasteful sound? Surely, something more than all that, something beautiful?

Perhaps you can question my idea of musical 'beauty,' but I hope you will all be willing to listen to me, and thinking of the work, and saying to yourselves: 'He is right about beauty.'

By Prof. Louis Cerrara

I was late—I admit it—and so I rushed into the front doors of the Main Hall of this college to write this review. And what to my wondering ears did we hear but the brilliant element of pain—ah, that great divided— that searcher out of later-day men—great—LOVELY. I thought that I could brave it, this review had to be done, for I had promised to get it over to the paper. Central in all, as I pushed against the sound and headed towards the steps of the tower. God—I was making it; only we had gathered. There wasn't that usual sense of lossing control of my bowels, and I knew that I had a chance. But that BEAUTIFUL, PATRIOTIC— that volume of singer and guitter and an organ, all plugged into SPEAKERS, was making the outside bricks of Alden Hall jump for joy at the knowledge of that beautiful pain. Everybody—everybody knew the noise—or if you will, volume. Every time I played in Church on Sunday, some little out, be it young or ancient, would come up and say 'Don't play so loud, you're making my fillings rattle'—and then I had the duty of saying— 'But this organ couldn't get loud if it tried'—needless to say they never be- lieved me.

And then I got to thinking—which is dangerous, because an academician should never think, he needed to reason, always—away from the whole concept of the Sanders— I was able to think, give me a break! The Sanders—what is it?—I was under the influence of Stravinsky when he wrote it, it was a lovely sound. And for those who like impressionist music there was the Francais 'Quartet for Flute, Oboe, Clarinet and Bassoon' and the Taffanel 'Wind Quintet.'

Both very sensual and lovely compositions. Sure, I had never heard of them before, but who has ever heard of the 'Falling Leaves'—I know them—they played pretty well. Sound doesn't come out of the soft or loud—must be painful? If anyone likes beauty and not volume, you needn't come to you. Try it out sometime, and for a starter, there was a rec- ord handed to this 'Holy Unbe­ liever' the other day which is the 'Days of Future Passed' which is not bad, not bad.
Student Government

At the Feb. 17 meeting of the Student Government, President Ron Stelmak proposed that Tech students become involved in a movement to lower the voting age. He talked about the Let Us Vote (LUV) group, a nationwide organization of young people working to support a bill offered in Congress which would change the legal voting age from 21 to 18. LUV operates by sending letters to Congressmen, Senators, governors, educators and other people who can influence the passage of this bill, and by sending out pamphlets explaining the contributions of people between 18 and 21 to society, in order to get others to support the idea. Stelmak said that LUV would like to start a chapter at W.P.I., and that they would need the services of some interested students as well as the facilities of the Student Government office.

Ron also stated that there is a bill before the Massachusetts State Senate to lower the voting age to 19 in this state. As many Tech students are from Massachusetts, they may prefer to work for the success of this measure.

At this meeting a suggestion was also made of an Intercollegiate Student Government Symposium sponsored by A.I.C. and held at Clark on Feb. 21. During this event college students could propose ideas for bills that they would like to see presented to the state legislature. Representatives of Tech at this council would be Lenny Polizzotto, Tony Torciano, Glen White and Paul Evans.

A suggestion was made to work for more unity between W.P.I. and Clark University. This would include correlating the school calendars, offering more classes open to students of both schools, and devising a transportation system to facilitate back-and-forth travel.

Another idea was to work an arrangement with Holy Cross so that a student from either school could take ROTC for the Army, Air Force, or Navy, as he chooses. Another topic brought up was Becker Junior College's proposed Intercollegiate Council. A motion was passed to offer support to the idea.

Other business included a plan to merge the Student Affairs Board and the Financial Board. This will be decided in a referendum to be held during the Student Government Elections.

S.A.M.
The Society for the Advancement of Management of Worcester Tech will sponsor a panel discussion entitled: THE BLACK MAN AS A MANAGER 7:30 P.M. THURSDAY, FEB. 27 Seminar Room, Gordon Library

Is it possible to be passed by at 30?

Absolutely. If you're a 30-year-old engineer who's failed to keep up with the latest developments in his field.

Because Western Electric's an acknowledged industrial leader in graduate engineering training, that's one worry our engineers don't have. Our nearly-completed Corporate Education Center near Princeton, N.J., for instance, will have a resident staff of over 100. More than 310 engineering courses will be offered, and about 2,400 engineers will study there in 1969. It's the most advanced facility of its kind.

Ask around. You'll find that when it comes to anticipating change, Western Electric is way out in front. And we make every effort to keep our engineers there too. See our recruiter or write College Relations, 222 Broadway, New York, N.Y. 10038.

A lot of study, and hard work, never hurt anyone.

Western Electric MANUFACTURING & SUPPLY UNIT OF THE BELL SYSTEM AN 11TH OPPORTUNITY EMPLOYER

also assume that it has to comply with what would normally be called an unjust act and that the normal procedures in solving problems and in changing the system are not available or not equal to the job, that there is no other way to achieve justice. I do not believe, from my limited information I have, that this was the case.

The impression I received at Tech Thursday morning was that "outsiders" were very involved in the Clark protest, that the "outsiders" had had a very large part in arousing the incident. This was a very hasty judgment on the part of some people. At Clark, I never even heard any rumors along this line. The evidence seems to be overwhelming that this was entirely a Clark-Holy Cross incident.

One Clark co-ed commented that "Our mistakes should be in the past. Let's forget the past."

This is often a prevalent attitude among whites. Unfortunately, we cannot forget the past as long as the effects of the past remain. Our forefathers, up to 1961 created, maintained, and tolerated the American institution of slavery. Our fathers tolerated, until very recently, segregation and suppression of the black American. We have inherited the blessings that our ancestors are responsible for and we have inherited the evils that our ancestors created. If we accept the blessings, we accept the responsibility for the evils, too.

It was perhaps no coincidence that the occupation of the administration building occurred the day before the anniversary of the assassination of Malcolm X. It was a coincidence that I was at that time, reading The Autobiography of Malcolm X, and, for some reason, had it with me at Clark. Malcolm X's spiritual descendants are today's black militants. Malcolm X, who was once called "the only man in America who could start or stop a race riot," and who once told a friend, "I don't know if I could start one. I don't know if I'd want to stop one," was a complex man who I could not describe in this short column. He was an extremist, but I think one in the tradition of Samuel Adams and John Brown. I cannot agree with all of his statements, but, if I was black, his picture would be on my wall.

Lord Jeffs

Drub Tech

Last Wednesday evening, Tech's basketball team, facing another one of New England's top five teams, Amherst, lost by a 96-74 margin. Foul trouble and the hot-shooting Lord Jeffs proved too much for the game Tech Worcester Tech Engineers.

Tech played the first half with determined, up-set-minded hopes, trailing by only five at the half, 41-36. The second half started with more good half control by Tech, but midway through the half, Tech ran into a tough spot. Tech's three big men, Gurney, Briggs, and Watson faded out. From there on, the Engineers were at the mercy of the powerful Amherst team who continued to rip the chords while Tech went stone cold.

Leading Tech scoring was Steve Watson who, despite having fouled out midway in the second half, managed to get 10 points — 10 in the first half. Others who scored in double figures were Sophs Ned Cunningham, Steve Adam, and Tim Reason with 14. Outlining out Tech's balanced scoring attack was Edie Griffin.

The Frosh game saw Amherst again dominate the play. Tech, down by as much as 62 at one time, would not give up and eventually lose by an 86-72 score.

Dorm Committee

first granting of paritcular privileges. Beginning in the spring of 1968, partial hours were allowed for upperclassmen, only with a limited weekend schedule. Through the efforts of Freshman class vice president, Jack Zorabed, and others, they have since been extended to freshmen, but these privileges are still limited to a relatively modest weekend schedule. The Dorm Committee was responsible for gathering information on student opinion and for proposing regulations and restrictions regarding partial hours.

The Food Committee has been primarily interested in complaints and suggestions regarding the Morgan dining hall. Their major achievement to date is an optional five day meal plan, to go into effect next semester. Students who prefer to eat off campus on weekends or who are usually away on Saturday and Sunday will benefit from this reduced plan. The committee, made up of five volunteers from the Dorm Committee, was instrumental in discovering student opinion of the proposed plan. The end of the semester tradition of costs and fees for dinner was also a result of this committee's work.

a greater interest and hopefully a greater initiative? Academically, we need and should strive for a reading week preceding Polizzotto hours is continued. The greater understanding and comprehension in his classes and the more time we can be allowed for free reading, the better for the student. Students who can participate are encouraged to do so.

Our interest lies in various organizations such as a member of the Student Activities Committee, Robert Tower, I.P.C., Class President and secretary of the Student Government, Richard Weisberg. I have seen the potential of student, student-faculty, and student-administrator cooperation; a potential which could lead to greater understanding and cooperation. If elected, I will certainly try my best to do a good job and work for you, the student of Worcester Tech.

Frosh Grapplers Win; Beat Hartford 28-13

Tech's freshmen matmen concluded their dual meet season Tuesday night by defeating the University of Hartford 28-12; making their overall record 2-1. Originally there were five fresh- man meets scheduled this year, but Williams and the University of New Hampshire were both cancelled.

Tuesday night's meet started off with no contests at 115 and 133 pound classes. At 138 pound class, Tech's Scott Wallace got things headed in the direction by pinning Knights of Hartford in 2:41, increasing his own record to 2-1. The next bout at 137 pound class was won for Tech by Al Dion 9:1. The 145 pound class was forfeited by Tech, and the next class was at 152 pounds.

Hartford's Allano edged out Jack Zorabed 6:4. Once again Tech forfeited at 140 pound class to Getler of Hartford, and at 167 pound class, Art Geister sith put on a crowd-pleasing performance by pinning Boarding of Hartford in 1:14, moving Art's record to 2-1. John O'Dan nel concluded things by accepting the forfeit at heavyweight for Tech.

Now that the freshmen dual meet season is completed, they are helping the varsity through the rest of their season and reading themselves for the fresh- man New England Tournament, which will be held here at Tech along with the varsity New England's on March 7th and 8th.

Winter Weekend 1969

FRIDAY, FEB. 28:

"The Sam and Dave Review"

Harrington Auditorium 8:30 P.M.

Tickets — $1.50 in Daniels Hall (4-6 P.M.)

SATURDAY, MARCH 1:

"The Proposition"

Alden Hall — 1:30 P.M.

Admission free to Tech students

Basketball: WPI vs. AIC

Harrington Auditorium 8:30 P.M.

Saw Sculpturing Judging

Sat. 10:00, Winner announced at basketball game sponsored by TKE

Sunday, March 2:

Worcester Art Museum Series

"The New York Brass Quintet"

Alden Hall — 3:00 P.M.

Admission free to public

Volunteers

their home life, and help them to build character.

However, in order for these activities to continue, there is an urgent need for more volun- teers. We seek the aid of your student government to help us in our search for more help. If your group could publicize our need to your student body, and obtain the names of interested students, the Y.A.K.S. would be grateful. We especially need students who will be in this area next year. The time needed is minimum, Tuesday nights, from 4-6 to 7:30 P.M. at the YMCA.

In order that we may contact them, please send the list of in- terested people, with their ad- dresses and phone numbers, to Philip A. Samko J-3 Carroll Ave. Worcester, Mass. 01610

Thank you for your help.

Sincerely yours,

Philip A. Samko
Chairman, Volunteer Promotion of Y.A.K.S.
The half ended with Tech on top 43-33. Griffith was unstoppable in the first half, hitting on eight of eleven shots, mostly long range bombs. Griffith had no closer than five points in the second half on two occasions, once at 43-43 and again at 54-53, but each time the Cougars appeared ready to close the gap, Tech would score an important basket and increase their lead.

Griffith’s consecutive run was backed by 15 from Rooney and 11 by Steve Watson. Neil Jaffe led Clark with 18 followed by Reich and Burr with 12 and Tom George with 11 points.

Tech’s Frosh also won, rolling over Clark 91-67. Jim Henderson was a one man show for Tech scoring 23 points and grabbing 38 rebounds. Paul Sullivan added 14 and John O’Brien 11.

The Frosh are 7-4 overall.

The Varsity has a 6-13 record. The last home game is Saturday, March 1, against AIC.

Phil Warren makes his move for a pin

Grillo loses a 7-5 decision in a real tough contest in the 123 lb. class. Co-captain Leney Polizotto followed in the 130 lb. class and pinned his man easily, thus raising his season’s overall record to 6-1.

Hartford won its final match of the season, as John Szotek of Tech was defeated 6-4 in a close decision. Pete Grisch won by forfeit in the 145 lb. class. Pete wrestled an exhibition match and came out on top of that.

The following two matches were won by pins as Greg Dickson and Ralph Eachbom both won for Tech in their weight classes. Sophomore Al Scarlenni followed in the 167 lb. class with a 7-4 decision for Tech. Phil Warren then pinned his man in the 177 lb. class.

midway in the second period. In the final official match, co-captain Pete Grisch defeated his man in the 145 division, making the final tally 48-3.

Eight exhibition matches followed the regular meet. Tech came out on top again winning five of eight. Greg Dickson is the 152 weight pinned his man as did mighty Fred Snyder, it was the unlimited. From Ken Klimber decided while Jeff Perry and Art Getersbow pinned their opponents. Getersbow put in a thrilling exhibition pinning his man halfway through the first period.

Tonight Tech will play but lose to UMaf, which promises to be one of the biggest matches of the year.

Wrestlers Pin Opponents, Best Season In Five Years

The Tech varsity wrestlers made a clean sweep of things last week as they turned back Hartford and Dartmouth in two home meets. The win over Dartmouth assured the team of a winning season, the first for Tech since the 1963-64 season.

The University of Hartford turned out to be no match for the Worcester grapplers as Tech handed them a 45-4 defeat. The meet, after a near capacity crowd at the Alumni Gym, saw Tech win 5 of the 11 matches by pins, 2 by decision, and 2 by forfeit.

Steve Sweeney, in the 115 lb. class, won by forfeit. The first match of the evening saw Bob midway in the second period. In the final official match, co-captain Pete Grisch defeated his man in the 145 division, making the final tally 48-3.

Eight exhibition matches followed the regular meet. Tech came out on top again winning five of eight. Greg Dickson is the 152 weight pinned his man as did mighty Fred Snyder, it was the unlimited. From Ken Klimber decided while Jeff Perry and Art Getersbow pinned their opponents. Getersbow put in a thrilling exhibition pinning his man halfway through the first period.

Tonight Tech will play but lose to UMaf, which promises to be one of the biggest matches of the year.

As IF basketball continues, the race tightens up even further. Idie Seattle in holds an unblemished 7-4 record. LCA, however, suffered its first defeat at the hands of ATO, 72-75. Their record is now 7-1. ATO then went on to defeat PKS and owns a 6-2 mark. PGD equalled this mark by defeating TEK and AEPI. In other action SAE defeated TC, PKS defeated SP, and the Shirdi overwhelmed DSET. PKT was also idle during the week. The team records now stand at:

SPE
7-0

LCA
7-1

PTK
5-3

ATO
6-2

PGD
6-2

SANE
3-3

PKS
5-4

AEPI
1-4

SP
1-6

TEK
5-5

DSET
6-7

TC
6-7

as a sharpshooting guard, led all scorers with 26 points — 20 of them coming in the first half, while forward Gurney controlled the backboards, snaring 26 rebounds in a good winning effort.

Tech’s sophomores, Tim Rooney, Steve Watson, Ned Cunningham, and Paul Plante along with Junior Ollie Briggs continually came through with the big play in upsetting Clark.

The victory held a double meaning for both clubs. Clark, with a 12-4 record coming into the game, was hopeful for an NCAA tournament berth, but now the hopes seem dimmed. Tech, on the other hand, evened an earlier loss to Clark — a 90-81 defeat in the Worcester Holiday Tournament, with the regular season victory.

After the 10-minute first of the half, when the lead changed hands several times, Tech took command and was never in danger of losing the decision. Clark held slim leads in the first quarter of play which ended deadlocked at 20-20. The score rose to 20-26 once again, at 22-22 and again at 24-24, the Cougars then took a 20-24 lead but Tech rallied off 12 straight points and Clark could never catch up after that.

Among the 495 wrestlers competing in the current New England Intercollegiate Wrestling Championships, to be held at Worcester Tech, is Central Connecticut’s Henry Marchetti.

Henry won the 137 pound laurels last year at the Coast Guard Academy. As of February 11, he had posted 10 wins with no losses, including eight pins. Central Connecticut wrestling authorities anticipate a perfect 13-0 record for Marchetti as he goes into the March 7-8 tournament. He should be a heavy favorite for the Marchetti’s championship performance.

Another top contender is Rob Lee Davidson, Brown University’s 130 pound standout. To date he has a 5-2 record, and the honor of a third place finish in last year’s tournament. Robbi will vie with Tech’s 135 pounder Lee- ney Polizotto, who finished second in last year’s championships.

The championships will be held in four sessions, with individual tickets available for each. Tickets for both Friday and Saturday sessions, are $1 each. The price.

The first meeting will last from 10 a.m. to approximately 5 p.m.; while the second session will begin at 7 p.m. The first Saturday session will begin at 11 a.m. continuing to about 5 p.m. This meeting will cost $1.00. while the admission prices for the varsity finals in the evening will be $1.25.
