Re: U. S. Design Application Serial No. D-164,213
filed July 19, 1971 entitled "FIRE DETECTOR" -
D. D. Pearsall, inventor - assigned to Statitrol

Dear Duane:

This application has been on file for several months and the question of filing foreign applications should now be considered.

In order to gain the benefit of your United States filing date on this application, such foreign applications must be filed before the expiration of one year from your United States filing date. If the foreign applications are filed after that time, it may be found that valid patent protection is impossible by reason of some publication, public use or other event which has occurred before the actual filing date of the foreign applications.

We would appreciate receiving your instructions as soon as possible so that we may have time to prepare the foreign forms, etc.

Very truly yours,

ANDERSON, SPANGLER & WYMORE
