STATITROL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

MARCH 31, 1976

AND

DECEMBER 31, 1976 (UNAUDITED)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation:

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Statitrol International Corporation. All significant intercompany transactions have been eliminated in consolidation.

Inventories:

Inventories are carried at the lower of cost (first-in, first-out) or market.

Depreciation and amortization:

Depreciation is provided on the straight-line method over the estimated useful lives of the related assets.

Patents are being amortized on the straight-line method over the future periods anticipated to be benefited.

Income taxes:

The Company provides in its accounts for the tax effect of timing differences, resulting from the recognition of income and deductions in different periods for financial and income tax reporting. These timing differences result principally from accelerated depreciation utilized for tax purposes, undistributed earnings of the Company's Domestic International Sales Corporation (DISC) subsidiary, Statitrol International Corporation and warranty expense provisions not deductible for income tax purposes.

Investment credits, which have not been material, are accounted for as reductions of income tax expense in the year allowable for income tax purposes.

Warranty expenses:

The Company recognizes the cost of product warranties when these costs are incurred, except that provisions are made for significant potential losses. These provisions are reviewed periodically and revisions made as required.
