ERRATA

Erratum: "A low-order model for vortex shedding patterns behind vibrating flexible cables" [Phys. Fluids 10, 1953 (1998)]

D. J. Olinger

Mechanical Engineering Department, Worcester Polytechnic Institute, Worcester, Massachusetts 01609

(Received 6 January 1999; accepted 11 January 1999)

[S1070-6631(99)00505-X]

Equations (5) and (6) of the above paper contain errors, and should read

$$\varepsilon = \frac{\nu \Delta t}{(\Delta z)^2} = \frac{\Omega(k^* - 1)^2}{\text{St Re}(\text{AR})^2}, \quad (5)$$

$$\varepsilon = \frac{\nu \Delta t}{(\Delta z)^2} = \frac{\Omega(k^* - 1)^2 \text{St} \tan^2 \beta}{\text{Re}(U_c/U_\infty)^2}. \quad (6)$$

The equations, $t = n\Delta t = n/2\pi f_e$, and $\Delta t = (2\pi f_e)^{-1}$, in the second and fifth paragraphs of Sec. II, should read $t = n\Delta t$

$= n/f_e$, and $\Delta t = f_e^{-1}$, respectively. As a result of these errors, all numerical AR (aspect ratio) and z/D values in Sec. IV should be multiplied by $\sqrt{2}\pi$.

There is a typographical error in Eq. (A2), which should read

$$\frac{\partial \omega_z}{\partial t} = \nu \frac{\partial^2 \omega_z}{\partial z^2}. \quad (\text{A2})$$

The main conclusions of the paper remain unchanged.
