Feeding Senegal’s Economy
Sirry Abdelrahman (CE), Michaella Balicki (ChE), Jasmine Higuera (ME), and Alex Witkin (BME)
Advisor: Professor Sharon Wulf (BUS) and Professor Kristin Wobbe (UGS)

Problem
Starvation in Senegal caused by poor economy

Solution Process
Farm School
• Work under Heifer International
• Educate 15 – 25 yr. olds on how to properly grow mangoes

Create Jobs
• Create white-fly traps to prevent harm towards mangoes
• Increase production for mango exportation 10 fold

Economic Benefits
• Increase Senegal’s income by 10%
• Citizens can afford nutritious food

Project Goals/Objectives
• Have self – sustainable communities by exporting mangoes
• Within 10 years, we anticipate improvement in the Southwestern Senegalese income

Assessment
- Use of FAO website
  - Mango production & % undernourished
- GDP data
- Income levels
- Mangos exported

Recommendation/Conclusions
Focus on farming mangoes
Increase mango exports
Increase Senegalese income

Top Production of Mango, 2009

Why Mangoes?
Senegal can become a successful mango producer and exporter similar to how Brazil became the number one producer and exporter of oranges.
