

Problem

Cause

- There are uninterested in improving writing skills
- Students don't know about these resources
- Cultural differences in writing styles and formatting

Impact

Known Writing Resources

Methodology

Participants: WPI Multilingual Students

Survey 1

- Students' Background
- 15 questions
- 20 Students
- Distributed through google forms

Intervention: Pamphlet

Survey 2

- Students' Background
- 15 questions
- Distributed through google forms

Solution

Writing Resources

Created By: Jose Li, Jody Carregal, Spencer Vinson and Adriana Alvarado

A go-to guide for any student struggling with their writing

What is Academic English? Why should it be important to you?

A multilingual student can grasp the social-English language within two years of living in America. To acquire the academic English language, the same student must practice it for at least five years. Academic English is the language in textbooks, classrooms, and on many tests. A diverse field of students struggle with their ability to master academic English. This struggle manifests in their writing, causing a decline in grades. **If you are struggling to maintain your grades due to your writing skills, choose to excel in academic English.** In choosing to excel in academic English, you also choose to excel in other aspects of schooling. Such aspects are learning to reason abstractly and quantitatively to construct robust arguments and critique reasoning of others to constructing explanations and designing solutions to engage in arguments from evidence to ask questions and define problems. **In choosing to excel in academic English, you are also choosing to excel in the career of your choice.** Writing is a necessary skill in any career field you chose to pursue.
