This Other is brought to you for free and open access by the MS055-02 Statitrol Records at Digital WPI. It has been accepted for inclusion in MS055-02-0006 Statitrol Products by an authorized administrator of Digital WPI. For more information, please contact digitalwpi@wpi.edu.
The Statitrol PL-300 immediately and effectively removes all static charges from surfaces within the area of its air distribution. High level static charges that are outside the area will also be removed... depending upon amount of charge and distance from the airstream.

The PL-300 produces both positive and negative "surplus" ions (electrical charges). A positive charge on a material will draw negative charges out of the airstream to effect neutralization.

Specifications:

Dimensions:
- Length: 20 inches
- Width: 8½ inches
- Height: 9 inches
- Overall handle: 22½ inches
- Over handle: 11½ inches

Light Weight:
Portable—weighs only 21 pounds

Rugged Construction:
Steel chassis, 18 gauge
Extruded aluminum handle and support bracket provides unlimited mounting positions.
Heavy-duty, cast-aluminum adjustment knobs for easy adjustments.

Economical:
Power consumption... 20 watts
115 volts, 60 CPS, single phase
Voltage adjustable for peak efficiency
Optimum setting—"110" to "120"

Fan:
Top quality—axial vane type
100 cubic feet per minute air delivery
Quiet operation. 5 year guarantee
No oiling required. Fan removable, snap-out frame
The axial vane type fan was selected because of its proven performance in hundreds of computer installations. As the only moving part of the PL-300, continuous reliable operation is assured.
Area of effective static control

To define area, a yardstick in terms of quantity of static charge has been developed.

The measure of an electrostatic charge must relate to surface area and strength, or quantity, of charge. Therefore, a new unit of measure is introduced—for the first time—the KILOVOLT FOOT.

ONE KILOVOLT FOOT (KVF)=1000 volts of electrostatic charge evenly distributed over a surface area of one square foot, either positive or negative.

Rate of neutralizing (reducing) a charge can now be identified. Kilovolt foot per second (KVF/S) is the reduction of a charge at a rate of 1000 volts over a surface area of one square foot in one second.

Rate of charge generation is important to "moving" processes.

The PL-300 will neutralize static charges, whether positive or negative, according to the following table:

<table>
<thead>
<tr>
<th>PL-300</th>
<th>COLUMN I</th>
<th>COLUMN II</th>
<th>COLUMN III</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Less than 2 seconds</td>
<td>Less than 10 seconds</td>
<td>Less than 30 seconds</td>
</tr>
<tr>
<td>THROW*</td>
<td>1 FOOT</td>
<td>6 FEET</td>
<td>15 FEET</td>
</tr>
<tr>
<td>SPREAD**</td>
<td>HORIZONTAL</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>1 ½ FEET</td>
<td>4 FEET</td>
<td>6 FEET</td>
</tr>
<tr>
<td></td>
<td>VERTICAL</td>
<td>1 FOOT</td>
<td>2 FEET</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1 FOOT</td>
<td>3 FEET</td>
</tr>
<tr>
<td>NEUTRALIZING RATE</td>
<td>2.5 KVF/S</td>
<td>.5 KVF/S</td>
<td>.166 KVF/S</td>
</tr>
</tbody>
</table>

*Throw is the distance from the PL-300 in the center of the airstream.
**Spread is the width and depth of the airstream at the maximum throw.

NOTE: A neutralizing rate of .05 KVF/S or higher is considered sufficient for normal darkroom operation.

Positive and negative ions (electrical charges) are produced in almost identical quantity with a slight excess of negative.

In terms of concentration of electric charges in each cubic foot of air at the distances shown in the table, the following are actual laboratory measurements:

COLUMN 1 (1 FOOT)........2500 Pico Coulombs per cubic foot
COLUMN 2 (6 FEET)........150 Pico Coulombs per cubic foot
COLUMN 3 (15 FEET)......20 Pico Coulombs per cubic foot

PL-300
F.O.B. POINT OF ORIGIN
$265.00

ACCESSORIES

WALL MOUNTING BRACKETS
Allows a convenient method of controlling air motion and directs the airstream to the more critical work areas without sacrificing bench or table space
PER PAIR.........................$1000

AIR FILTER
¼" thick wire mesh filter media adapts directly to fan inlet
EACH..........................$300

LIGHT SHIELD
For those critical applications such as unexposed film within two feet of the PL-300. Adapts easily to knob shafts with adjustment identical to universal handle
EACH..........................$1700

Manufactured by the STATITROL CORPORATION, 1030 W. Ellsworth Ave., Denver, Colorado 80223

Approx. 1969
